Public files not officially at a 'release' directory may be automatically generated, mostly for diagnostics. Usually, not expected useful for developer or end user. Completeness and notability may not be expected.

## Authentic Software

Official publicly accessible locations of Soaring Distributions LLC are normally HTTPS or similarly provable sites controlled by Soaring Distributions LLC.

[https://u298813-sub\\*.your-storagebox.de](https://u298813-sub*.your-storagebox.de)  
<https://u298813-sub7.your-storagebox.de>  
(hosted by Hetzner)

[https://soaringDistributions.github.io/site\\_distLLC](https://soaringDistributions.github.io/site_distLLC)  
(hosted by GitHub)

Unless officially and provably directed to do so by authorized personnel of Soaring Distributions LLC (ie. manager of Soaring Distributions LLC, mirage335), or unless the products are provably identical, Soaring Distributions LLC cannot reasonably guarantee similar expectations for products obtained from other locations.

# Usage

Files may be downloaded from command-line.

```
wget --user u298813-sub7 --password wnEtWtT9UDyJiCGw 'https://u298813-sub7.your-storagebox.de/file'
```

## Plain Text

An essentially plain text copy of this document is normally available as 'README.sh.out.txt' , generated by 'scriptedIllustrator'.

Assistive technologies may be able to more usefully parse this.

## Free/Libre and Open Source Software (FLOSS)

Most if not all software from Soaring Distributions LLC is Free/Libre and Open Source Software.

Please see included software licenses.

Distributing individual files or pieces of files without other relevant information (ie. without corresponding source code) may not be possible.

Some software may be created by Soaring Distributions LLC manager, mirage335, for and on behalf of Soaring Distributions LLC.

# NVIDIA

Use of NVIDIA hardware may require users to have an internet connection or similar convenience to download and run theirselves.

A syscall exception may be what allows distribution of NVIDIA proprietary binary Linux modules at all. Or, so long as NVIDIA can dubiously claim their proprietary binary Linux kernel module may not be a derived work of a GPLv2 licensed Linux kernel, NVIDIA may argue that an 'attempt otherwise to' 'sublicense' the Linux kernel has not occurred, and thus NVIDIA may claim their rights did not yet 'automatically terminate'. Seemingly, the absence of distribution of LiveCD/LiveUSB images with NVIDIA drivers included and installed suggests the open-source community does not find any such arguments compelling. Yet, while there apparently have been US court cases involving the GPLv2 copyright license, the NVIDIA proprietary kernel driver issue has apparently not been raised as of 2022.

Meanwhile, Soaring Distributions LLC is at least reluctant if not unwilling to itself distribute binary Linux kernel modules.

If Soaring Distributions LLC distributes software which users may run to receive and run software from third-party distributors (eg. if Soaring Distributions provides a script to download and run NVIDIA proprietary drivers), and if this is perceived as some issue, any 'cease-and-desist' should be sent directly to those third party distributors (ie. NVIDIA, Debian, Ubuntu, OEMs, etc), NOT to Soaring Distributions LLC itself. Soaring Distributions LLC may not yet on its own be able to prove, but does not discount, that those distributors (ie. at least NVIDIA) may be coercively, flagrantly, willfully, exploiting for commercial gain, to the extent of many years and multiple billions of dollars, violating the GPLv2 copyright license of the Linux kernel.

To the extent legally possible, Soaring Distributions LLC should be reasonably expected to publish, and specifically make relevant third-parties aware of, any such notices.
